

Fiber & Power Feeder Clamp

The clamp is designed to secure 2 to 6 fiber cables and power cables

It is installed on cable ladder, rung, bracket, profile such as towers, ladders and masts at telecom site . Without additional adapters, provide sturdy, reliable, long-term support

- . Easy-to-install
- . Wind loaded
- . UV and corrosion resistant
- . Fragility-resistant plastic material
- . Capable to working in extreme temperature
- . Recommend distance of clamps:0.5m
- . Provide various fiber cable and power cable with rubber i
- . Fiber optic cable with a diameter of 7 mm and power cable with a diameter of 9 mm

Item	Standard
Cable size	7mm & 9 mm
Metal component material	Stainless steel
Plastic component material	PP reinforced with glass fiber
Rubber material	TPV or EPDM
Cable runs	6 way
Resistance to corrosion	High
Temperature Operation	-15 c to +60 c
Resistance to humidity	100%
